### **DETAILED ACTION**

1. Submission filed February 28, 2006 has been entered and acknowledged by the examiner.
2. Applicant's arguments, see Pages 12-20, filed February 28, 2006, with respect to the rejections of the claims have been fully considered and are persuasive. The rejections of claims 1,3-15 have been withdrawn.

### ***Allowable Subject Matter***

3. Claim 1,3-15,21-24 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art discloses a flat panel display device meeting the requirements of applicant's newly amended claim 1 with the exception of the requirement that the plurality of conductive layers be made of carbon nanotubes. The prior art discloses the conductive layers to be made of DLC. While carbon nanotubes are well known as a suitable and often advantageous substitute for DLC, this would not have obviously been the case for the DLC film of the prior art (used to prevent the adsorption of gasses onto the phosphor). Therefore claim 1 is allowed. The prior art does not disclose a display device according to claim 21, namely one in which a carbon conductive on the phosphor layer is in contact with a black matrix layer. Therefore claim 21, is allowed. Claims 3-15,20-24 are allowed as a result of their dependence upon claim 1 or 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
